**Subject:** PLUS building

- What does PLUS mean to you?
- What difference would it make if PLUS was to be successful with a building?
- What impact does PLUS have on you? (learning, training, development, future career aspirations)
- Are you able to suggest any community benefits PLUS offers?

Hello [REDACTED]

I am writing to you as a sessional staff and coordinator at PLUS.

As I'm sure you are aware PLUS is of massive importance to both staff and families who use our wonderful service. As a staff member and sessional coordinator, PLUS is extremely important to me, it provides me with a comfortable, secure and happy workplace that develops the learning I look to acquire for my future career in teaching.

As a service, we provide a safe space that allows young people to flourish and be supported in their development whilst feeling comfortable and enjoying themselves, the laughs and smiles we see daily prove the importance of PLUS as an organisation. If we were to be successful with a building, we could continue to support our young people and adults that rely so heavily on us. I have been provided with valuable training that have helped me grow as a staff member and as an individual, these are skills I will carry with me and update as I continue to progress.

I am currently studying at University to become a primary teacher, this has always been a dream career of mine, since working at PLUS, I have realised how important it is to me and how I would love to teach in a provision or school that develops the learning of children with additional support needs.

Myself, all the staff at PLUS and families would be extremely grateful if we were to be granted the ability to use this building, it would supply us with the permanent, comfortable and secure space to continue doing what PLUS does best, make young people, adults and families smile.

Thank you,

Kind Regards,
