Dear [REDACTED]

I have been made aware of the possible plus acquisition of a building in the area through my work for Plus. I am a support worker in plus and see first hand the vital role it plays in the family's we support lives. So many of them say it is a lifesaver, allowing them to receive respite whilst knowing their child is in a safe environment.

The young people we support also love being at plus for many of the adults it is one of the few times a week where they can meet with their peers and work towards independence.

Having a consistent building is vital to the work we do as many of the young people we support struggle with frequent change.

I hope you would consider Plus in your deliberations.

Have a lovely day.
