Support for families

I wrote this email to you in support of the Support for Families team being granted access to the premises you have on offer.

Support for families is a unique service which offers a wide range of support for the most vulnerable families. I have first hand experience with the team and the vital work they do. I feel this service would be a great asset to Cornton and I'm sure there are many new families who would benefit from the service within the Cornton community. There are so many children who have trauma through drug and alcohol misuse and this service provides a safe space for children alongside providing experiences they would not usually have access to due to financial difficulties and poverty.

I hope you consider this great charity and welcome them into your community in the near future.

Yours faithfully
