**Subject:** Plus building acquisition.

Hi my name is [REDACTED]

Regarding the possible asset transfer from SPS to Plus. I have been using Plus since i was 1 yr old so some 30 years now. I would like to share how plus has helped me over the years and why it is still essential to me today.

As a small child wheelchair user i got support from Plus to access the playbus from playgroup. When I was 4 I went to a circus skills workshop which Plus ran which I really enjoyed.

The Plus support continued into school age where i was supported to go to brownies and guides and achieve all the things my able-bodied peers were achieving and accessing.

In summer 2003 i went to guide camp at Netherurd and was able to go and stay as i had support from plus.

All through primary school i accessed plus and got assistance with physio and medication to eat lunch, some things that the school was unable to provide which allowed me to stay in mainstream school.

I made use of the befriending project which helped me develop long term friendships though to the present day.

In high school Plus supported me in the holidays to explore my creative side and this formed a lifelong passion for theatre and acting which i still enjoy and have made lifelong friendships through this opportunity. Plus activities are age appropriate for teens. I would have missed out. I did a computer network course which Plus provided and I met people which I still keep in contact with.

The course helped me learn new skills.

At Plus at the moment we do pizza making, baking, movie nights, quizzes and game nights. We also go into the community to the cinema or for out for a meal.

We have themed nights like halloween and neon night.

Giving plus this building will give them security, safe access to equipment, parking on a bus route attractive community based premises. We hope you will help safeguard this service for this generation and the future.

Thanks
