Subject: Plus for space

Hi,

I am getting in touch to request support for plus to get a space within the building.

Plus is an essential service that has no comparable organisation in Stirling to support young people with complex additional support needs. These young people are the most vulnerable in society and need a safe secure place to relax, make friends and most importantly have fun.

Without this service parents would be less able to look after their own children and benefit from the respite plus allows. This is essential to allow these young people and families to reach their full potential.

The benefits of plus don't just service the families they support but offer opportunities for volunteering and generally creating a more inclusive, kind society.

Thanks [REDACTED]
