Subject: Support for PLUS

Hello

I would like to support PLUS 's application for an asset transfer for 'The Family Hub'.

I first came across Plus in 2010 when the son of a friend presented a short video as part of a PLUS activity. He described how empowered he now felt. I was blown away by the positive impact that he experienced as a result and since then I have seen the impact for children, adults and families in feeling a sense of belonging and connection with others. It has always been a community driven organisation. I have also seen young people who begin their working life with PLUS from a wide variety of backgrounds, and then flourish as individuals and in career paths within and outwith PLUS. PLUS employs over 70 employees and also provides opportunities for volunteers, including those with additional support needs or other barriers. PLUS offers a unique learning environment. Students from nursing, psychology and social work are regularly placed there.

The Hub would massively enhance what is offered to the community in terms of inclusiveness and opportunities. The children and families (around 200 families over the year) who use PLUS would benefit from being located in a community with the amazing resources it has to offer, rather than in an industrial estate and in a building which is much more fit for purpose.
