Plus support

I would like to send a letter of support for PLUS.

As a retired Nurse Practitioner in General Practice I have personally seen the results of the service of PLUS not only for the children and young adults but for the parents of these young people.

For some families it is a life line for all concerned. Parents have chosen this service because the support ,education ,play, and emotional support this service gives it cannot be quantified in money but also the emotional needs of the individual and also the families.

Should this service be removed what will happen to these individuals ?

If ever a service needed a permanent home and safe place then this is the service that it should be. This charity has fought tooth and nail for many long years to provide for the young adults and families. They have fund raised moved premises fought funding cuts and much more.

Please support this service and give them a safe and as permanent home as possible.

Kind regards
