Plus Application

My name is [REDACTED] and I have had the opportunity to support Plus in many events organised by them. Although we haven't sight out any support from them I have seen the wonderful work that they have carried out with young people and their families. They are very professional in the support that they offer to all concerned. I have worked with them in a community based education and have seen first hand the excellent work and support they give families who otherwise maybe lost. They are listened to and are proactive in their approach. I know that Plus has struggled to find appropriate accommodation for all aspects of the work they do. To have somewhere that is in good condition, warm,welcoming would make a huge difference to children, young people and families they support. To be able to carry out their work and introduce new initiatives will be such an advantage to all concerned. To be able to open their doors to the wider community and explain their ongoing work, to bring them along and hope garnish the volunteer support would be such an advantage. I really hope that their application is successful for this ling running organisation who have support many families in the past, present and continue to do that in the future.

Yours
