Dear Sirs

Re: PLUS Forth valley, Family Hub Cornton, Stirling

Inspiring Communities are a community regeneration charity delivering employability, volunteering, training, digital and services designed to tackle social isolation and loneliness in priority areas across Stirling. We also deliver award winning intergenerational activities and align all of our services to tackle the national performance framework. Further information can be found on our website or social media (details provided below).

We write in support of the above project. PLUS are a long standing, well respected charity with a track record of involvement with the communities which they and their beneficiaries belong to. The Family Hub space would be well utilised by them and we know from their excellent partnership working, they will seek to ensure additional services and activities are offered by other providers, where they are able to.

We wish the project every success and are delighted with the opportunities it will bring to the area and their own beneficiaries.

Yours sincerely
