

Hi [REDACTED]

I'd love to give some feedback/ideas about the service.

1. I would be happy to support the proposed move. The bigger premises would allow the invaluable support to extend to others who need it. The site is also much more accessible with a welcoming and safe outside space. This would make a huge difference to clients and (potentially) their families.
2. The new space would benefit the local area in various ways, such as, accessibility, visibility and awareness, also reducing stigma through integration and acceptance of the service and the needs of its clients and families.
3. The work that they already do is crucial. Ideally, bigger premises/more staff would allow more people to access and benefit from the fabulous support that is already making such a difference. Perhaps running family groups/sessions make also be an option if the service can be expanded. Perhaps the service could also begin training volunteers, particularly clients that have benefitted from the service (peer support).

Good Luck
