Support for Plus

Good afternoon, I'm emailing in support of the current enquiries plus is having with the family centre building. Plus has changed the lives of so many young people and adults with various additional support needs. It gives them a place where they can feel heard and currently the lease on the PLUS building has ended. These young people need that routine where they can attend their plus events and build the relationships they deserve. Plus is so important in giving families and carers that respite but also having them at ease that their loved ones are in safe hands. Our building already is worse for wear and it is becoming a hazard for our young people too. Having our own building would allow for young people to have that reassurance that we won't get the building taken away from us again. This transfer I know would be a lot of hard work however, I do believe it would be for the better as the original building is not ideal to travel to for both staff and service users. Please consider this when making your decision.
