Plus forth valley

Hi

I am a support worker who works with the children and young people at plus It would be amazing if plus were able to take on your building.

This charity not only means a lot to me as a supportive and flexible place to work while I study to become an occupational therapist and the chance to do what I'm passionate about but also means so much to the families that use our service so their young people can get some time to socialise and play in a safe and fun environment and provide some vital respite for carers.

If we were lucky enough to get the building it would make a massive difference for the young people as they would have the same stable base every time they come to plus which will help them feel more comfortable instead of always having to change buildings which may increase stress.

Plus also benefits the community as it gives our young people the opportunity and the confidence to take part in community projects.

Plus also provides training for professionals and this allows for awareness of things like different communication methods and which helps to educate other organisations and members of the public about these important topics.

I hope you will consider all of the amazing things that this charity does in making the decision Thank you for your time [REDACTED] (Plus forth valley support worker)
