Subject: Support for PLUS

Hi [REDACTED]

I'm emailing regarding support for PLUS to purchase the family hub building in Cornton.

We've been using PLUS for around 6 years, and it's made a huge difference to our family in terms of meeting parents who have children with similar needs and being able to talk about the challenges, swap advice and support. It's also been great for our son to meet similar peers and for us to have a little time out while he's attending 1:1 sessions. The staff and leadership are fabulous and without this vital service, families that are already struggling may be left without any support.

PLUS would benefit the local community as there are no doubt children with additional support needs locally who could benefit from the services offered.

Having a permanent residence would mean young people using the services not having to transition at the end of lease agreements. This is huge, as transitions can be really challenging for some of the young people that access PLUS.

A lot of families that use PLUS are 'on the edge' mentally as having children with additional support needs is hard, with increased mental and physical loads, sometimes medical concerns, and typically a lot to worry about. In general, there is not much support available to us, so losing PLUS would be a disaster.

If you have any questions, please feel welcome to reach out.

With best wishes,
[REDACTED]
