Subject: Plus building

Hello

I wanted to send an email as one of the parents who highly rely on plus and their services. Plus means everything to us as a family this gives us rest bite foe our family and more importantly my boy without this service we would find it extremely difficult as a family. I think this would mean so much for families in Stirling area as disabilty in kids seems to be on the increase and families are waiting on this service as i cant think of a service that offers restbite for families and offers support for families living with kids with disabilities. Another important aspect of plus is the social aspect my son has made friends for life and he can be himself instead of having to mask his disability which is massive he can relax and enjoy himself with friends that understand and may have similar interests. I hope you take plus into consideration for this building as I cant think of a company that deserves it more and more.importsntly the families.

Thanks
