1.0 Key Messages

Key messages drawn from this quarterly report are as follows:

- The weekly average prison population decreased by 1.2% in Quarter 3 25/26 (1st October to 31st December 2025) compared to the end of the previous quarter. Compared to the same period last year, the prison population increased by 0.8%.
- The remand population increased by 1.6% in Quarter 3 25/26.
- The long-term population increased by 3.3% in Quarter 3 25/26 while the short-term population reduced by 4.3%.
- The women's prison population reduced by 12.9% between the last week of September and last week of December.
- The population of those with a history of sexual offending increased by 1.3% in Quarter 3 25/26 compared to Q2 25/26.
- Single cell occupancy increased throughout Quarter 3 25/26.
- In Q3 25/26, the majority of the prison population were British (91%), male (96%), white (92%), heterosexual (88%) and had a marital status of single (77%).
- The national rate of imprisonment in Scotland remained steady at 0.2% at the end of December. Rates of imprisonment equal to or above the national rate were observed in 9 of 32 Local Authorities.
- 41% of those in our care come from the 20% most deprived areas of Scotland.
- The number of releases on Home Detention Curfew (HDC) reduced by 26% in Q3 25/26 compared to the previous quarter.

For general enquiries, please email SPSDataAnalysis@prisons.gov.scot.

2.0 Prison Population

The daily prison population rose throughout October 2025 and beginning of November, reaching a peak of 8,441 on the 10th of November, before declining steadily through to the end of December 2025. Overall, the daily prison population decreased by 1.3% at the end of Q3 25/26 compared to the end of the previous quarter (Q2 25/26).

The weekly average prison population decreased by 1.2% in the last week of Q3 25/26 compared to the last week of Q2 25/26. The graph below illustrates that the quarterly average population rose in Q3 25/26 compared to the same period last year (Q3 24/25), from 8,264 in Q3 24/25 to 8,282 in Q3 25/26 (an increase of 0.8%).

The decrease in the prison population coincides with the Early Release of (Scotland) Regulations 2025. Between 11th November and 13th December 2025, 286 individuals on short-term sentences were released early. This took place over 3 tranches, two tranches in November and one tranche in December, plus two delayed releases between tranche dates.

The Scottish Prison Service (SPS) also publishes Prison Population Reports illustrating the population in custody broken down by custody type, gender, and age, as well as the population on Home Detention Curfew by gender. The Prison Population Reports can be found at the links below:

[Prison Population Report – Weekly time series](#)

[Prison Population Report – Annual Prison Population](#)

3.0 Complexities of Population

The rising overall population numbers are of concern in terms of ongoing management. However, another factor of note is the rising complexity of Scotland’s prison population. Many individuals need to be accommodated separately for a variety of reasons, including their legal status, gender, offence type, protection status, and/or health care needs, as well as residents with individual management needs.

The number of those in our care who must be accommodated separately slightly increased throughout Q3 25/26. An average of around 62.4% of the prison population, or 5,199 individuals, needed to be accommodated separately in Q3 25/26, compared to 61.5% of the prison population (5,094 individuals) in the previous quarter.

4.0 Legal Status (Sentenced & Remand)

The remand population increased by 1.6% in the last week of Q3 25/26 compared to the last week of the previous quarter. Compared to the same period last year, the remand population reduced by 0.5%, from an average of 1,837 in Q3 24/25 to an average of 1,827 in Q3 25/26.

The number of individuals on remand remains high compared to the pre-pandemic period. In Q3 25/26, the remand population accounted for 21.9% of the total prison population. High numbers of individuals on remand can create management issues for establishments, such as people having to move to convicted halls early; and long periods on remand mean that individuals spend longer without access to the full regime.

The average long-term population rose to 2,885 in Q3 25/26, an increase of 3.3% compared to the previous quarter (2,793 in Q2 25/26). The average short-term population decreased from 2,252 in Q2 25/26 to 2,156 in Q3 25/26 (a decrease of 4.3%). Life sentences (including OLRs) remained broadly stable in the last three quarters.

5.0 Young People in our Care

The average quarterly number of Young People (YP) in our care decreased from 163 in Q2 25/26 to 158 in Q3 25/26, a decrease of 3.2%. As observed below, the average number of Convicted Young People (YP) increased slightly, while the number of Untried YP and CAS (Convicted Awaiting Sentence) YP showed a slight decrease.

6.0 Women in our Care

The weekly average women’s population reduced from 349 in the last week of September to 304 in the last week of December, a decrease of 12.9%. Between 11th November and 13th December 2025, 51 women were released early under the Early Release of (Scotland) Regulations 2025. Compared to the same quarter in the previous year, the quarterly average women’s population reduced from 338 in Q3 24/25 to 330 in Q3 25/26. In the same period, the male population increased by 0.8%.

7.0 Equality and Diversity

The Scottish Prison Service aims to provide accessible services to meet the needs of those in our care. This means an ongoing commitment to promote equal opportunities through policies and strategies to promote equality throughout all our establishments. The following data presents an overview of the diversity of the 8,283 people in our care on 31st December 2025¹. Information regarding religious affiliation is not robust enough to publish at this stage. Further Equality and Diversity reports are available here.

Affirmed Gender

SPS defines affirmed gender as the gender in which a person lives their day-to-day life. It may differ from the gender assigned at birth, which is the gender a person was originally registered as on their birth certificate. Non-binary individuals identify themselves as having no gender or as being on a gender spectrum² between man and woman. Gender-fluid is defined³ by “not having only one gender or moving freely between genders.”

In Q3 25/26, 96% of the people in our care were recorded as men and another 4% were recorded as women. Trans men, trans women and non-binary/gender-fluid combined accounted for less than 1% of the total population. In total, there were 22 transgender people in custody at the end of Q3 25/26.

¹ The Public Information Page is a working document. The inclusion of data on protected characteristics is being kept under review to ensure the public scrutiny requirements are met whilst protecting the privacy of those in our care.

² Available on the [ONS website](#)

³ Cambridge Dictionary definition available on <https://dictionary.cambridge.org/dictionary/english/gender-fluid>

Sexual Orientation

Most of the people in our care declared themselves as heterosexual (88%). Bisexuals, gay men and gay women combined accounted for less than 2% of the population. Another 3% preferred not to disclose their sexual orientation, while answers were not obtained from a further 7%. More details are illustrated in the chart below.

Age Group and Marital Status

The chart below illustrates the prison population in Q3 25/26 by age group (left) and marital status (right). The most populous age group continues to be age 31-40 (35%), while the smallest group is individuals over 70 years old (2%).

77% of the people in our care reported themselves as single in Q3 25/26. Another 7% self-reported as “Common Law (or cohabitation with a partner)”. Married people accounted for 8% of the custodial population.

Nationality

British nationals accounted for 91% of the prison population in Q3 25/26, while Romanian, Polish, Albanian and Vietnamese nationals accounted for 1% each. All other nationalities⁴ combined represented 4% of the prison population in the same period.

⁴ The other nationalities are: Irish, Bulgarian, Somalian, Portuguese, Nigerian, Latvian, Hungarian, Zimbabwean, Brazilian, Turkish, French, Lithuanian, Chinese, Slovakian, Sierra Leonean, Iranian, Moroccan, Danish, Sudanese, Egyptian, Indian, Pakistani, Algerian, Syrian, Eritrean, Spanish, Iraqi, Ghanaian, Mexican, Afghan, Mauritian, German, Libyan, Norwegian, Israeli, Namibian, Italian, Greek, Senegalese, Undetermined, Ukrainian, Bangladeshi, Gambian, Jamaican, Batswana, Dutch, American, Other Asian, Sri Lankan, Nepalese, Saint Lucian, Fijian, Czech, Canadian, Russian, Georgian, Indonesian, Angolan, Tunisian, Congolese, Chadian, Malawian, Ecuadorian, Belgian, Thai, Estonian, Zambian.

SPS Corporate Report

Ethnic Group

In Q3 25/26, 92% of the prison population declared themselves as White. African people comprised 1% of the population, while Asian, Asian Scottish or Asian British people accounted for 3%. Those who declared themselves to be Caribbean or Black were 1%. Those who declared themselves as “Other Ethnic Group” and “Mixed or Multiple” represented 2% and 1%, respectively. More details can be observed in the chart below.

SPS Corporate Report

Disability

Eleven percent of the people in our prisons have told us that they have a disability. Another 86% did not report any disability, and 2% opted not to disclose.

Disability	
Yes	11%
No	86%
Choose not to Disclose	2%

8.0 Protection Populations

There are people with a history of sexual offending in each of Scotland’s prisons, each of whom must be kept separate from the mainstream population.

The graph below shows the average population with a history of sexual offending, which illustrates the impact on the operational running of each prison as accommodation needs grow for this group.

The average population with a history of sexual offending in custody increased by 1.3% in Q3 25/26 compared to the previous quarter. On average, the population of those with history of sexual offending in Q3 25/26 increased by 9% compared to the same period last year.

While the overall population has declined, those in custody with a history of sexual offending has continued to increase, reflecting the exemption of sexual offences from eligibility under the Early Release of Prisoners (Scotland) Regulations 2025.

Non-Offence Protections (NOPs) also need to be located and managed separately from the mainstream population, due to being identified as at risk should they associate with specific individuals. There are a number of factors which can contribute to the application of these Protections, such as previous or current charges which have received negative media attention and could endanger the individuals, previous employment in the Police or Prison services, or having generated enemies and/or debts to an extent that there may be a risk to the individual should they be allocated into a mainstream residential area. This

negatively impacts the operational running of the prison because NOP individuals sometimes need to be accommodated and managed separately, depending on the severity of need for protection status.

The quarterly average number of individuals within the NOP population increased by 5.5% to 537 in Q3 25/26, up from 509 in Q2 25/26.

9.0 Geography of Imprisonment in Scotland

When breaking down the average prison population by Local Authority (LA), we consider an individual’s LA to be the one which corresponds to the last known postcode on record for their home address.

Individuals with last known postcodes in Glasgow City continued to comprise the largest proportion of the total prison population at 18% (1,448 individuals) at the end of Q3 25/26. The City of Edinburgh had the second largest prison population in Q3 2025/26 with 657 individuals, followed by North Lanarkshire (557) and Fife (528).

Orkney Islands, Shetland Islands and Na H-Eileanan Siar have the smallest numbers of individuals in custody: these three Local Authorities combined comprise 0.6% of the total of residents in prison.

According to Prison Records, 6% of the people in our care recorded an address outwith Scotland and are therefore not associated with any Scottish LA. Another 0.8% do not have an identifiable address or do not have any address recorded in our system

The map below illustrates the number of people in custody by LA on the last day of Q3 25/26 (31st December 2025).

Number of People in Custody by Local Authority

Business Objects

The national rate of imprisonment in Scotland⁵ was 0.2% at the end of December 2025. Rates of imprisonment equal to or above the national rate were observed in 9 of the 32 LAs.

The map below illustrates the rate of imprisonment by LA on 31st December 2025.

Rate of Imprisonment by Local Authority

Business Objects

⁵ The Scottish population figures used to calculate the rate of imprisonment was obtained from [Scotland's Census 2022](#)

The table below illustrates the total number of individuals in custody on 31st December 2025, broken down by length of sentence and LA.

	Remand + Undetermined Sentence	Short Term Prisoners - Less than 4 years	Long Term Prisoners - Over 4 Years (including Life)
Aberdeen City	185	136	140
Aberdeenshire	88	40	43
Angus	46	16	28
Argyll and Bute	43	20	12
City of Edinburgh	328	182	147
Clackmannanshire	31	21	32

Shetland Islands	8	<5	<5
South Ayrshire	59	37	26
South Lanarkshire	220	122	104
Stirling	35	22	22
West Dunbartonshire	83	31	41
West Lothian	120	61	56

Deprivation

The data extracted from the Prison Records on 31st December 2025 indicated that 41% of the prison population came from the 20% most deprived areas of Scotland, while 3% came from the 20% least deprived areas⁶.

⁶ The Scottish Index Multiple Deprivation (SIMD) is a relative measure of deprivation across 6,976 small areas. SIMD ranks from most deprived (ranked 1) to least deprived (ranked 6,976). This Public Information Page linked SIMD Geographical Data to the postcode of those in our care and focused on the areas below 20% most deprived data zones in Scotland.

10.0 International Comparisons

The figure below shows the prison population per 100,000 people for a selection of European countries⁷. Scotland has a rate of 149 prisoners for every 100,000 people.

⁷ [World Prison Brief](#), accessed in September 2025.

11.0 Prison Estate & Configuration

At the end of December 2025, nine establishments were operating at or over the agreed Assessed Capacity Tolerance (ACT). Another six establishments were operating very close to ACT.

During Q3 25/26, the monthly average number of people accommodated in single cells increased from 5,266 individuals in October to 5,308 in December, while the number of people accommodated in double cells reduced by 5%.

Between January 2025 and December 2025, the average number of people accommodated in single cells rose by 0.8%. In the same period, the average number of people accommodated in double cells remained stable.

PR2

Current Single Cell Occupancy (SCO) figures illustrate the impact that the rising and increasingly complex population is having on the ability to provide individuals with single cells. In the short term, SPS is unable to increase the capacity to offer individuals single cells, as this would require building new establishments or re-designing existing ones. Over Q3 25/26, monthly average SCO rose from 62.8% in October to 64.1% in December.

12.0 Staffing Levels

Due to resourcing constraints, it is not possible to provide analysis of staffing levels in this quarter’s publication. We will endeavour to resolve this at the earliest possible opportunity.

13.0 Open Estate

To progress to less secure conditions, an individual must undergo case management and the level of risk of moving them must be agreed by the SPS and key partners. All members of the convicted population can be eligible once the criteria are met. This process is managed via Castle Huntly for adult males, HMP&YOI Polmont for Young People and HMP Stirling for the female estate.

The population of Castle Huntly (also known as the Open Estate) increased slightly over Q3 25/26, from an average of 192 in October 2025 to 199 in December 2025. This was a 13% increase from the end of Q3 25/26 compared to the end of the previous quarter.

Identifying people held in less secure conditions within HMP&YOI Polmont and HMP Stirling is complicated by the structure of management information held by SPS. Work is underway to report upon these populations.

14.0 Home Detention Curfew (HDC)

The number of people on HDC increased in October, reaching a total of 129 at the end of the month, then reduced steadily throughout November and December. The reduction was recorded over the same timeframe in which three tranches of releases under the Early Release of Prisoners (Scotland) Regulations 2025 took place. The graph below illustrates that the quarterly average number decreased in Q3 25/26 compared to the same period last year (Q3 24/25), from 130 in Q3 24/25 to 103 in Q3 25/26 (a decrease of 21%).

The average number of people released on HDC reduced by 26% in Q3 25/26 compared to Q2 25/26. The graph below illustrates that the quarterly average number of people released on HDC also decreased in Q3 25/26 compared to the same period last year (Q3 24/25), from 155 in Q3 24/25 to 102 in Q3 25/26 (a decrease of 34%).

15.0 Face to Face & Virtual Visits

Due to an issue with data access, it is not possible to provide analysis of visits in this quarter. We will endeavour to fix this at the earliest possible opportunity.

16.0 Deaths in Custody

The Scottish Prison Service categorises the causes of deaths in custody into 5 categories:

- Homicide
- Natural Cause
- Suicide
- Unascertained- following medical investigation
- Undetermined intent/Overdose

There were 14 deaths in custody in Q3 25/26. This is an increase of 5 from the previous reporting period but a reduction of 7 from the same period in 2024/25. The below chart provides deaths by quarter and cause.

Figure 1 SPS Health Policy Data

All deaths in custody between Q3 24/25 and Q3 25/26 occurred in the male population. The age distribution can be seen below. 71% of deaths in Q3 25/26 occurred in men aged between 36 and 55.

Figure 2 SPS Health Policy Data

17.0 Additional Information and Useful Links

About this report

The Public Information Page (PIP) is a quarterly report published by the Scottish Prison Service (SPS) to provide transparency about various metrics related to the running of prisons in Scotland. Data is extracted from SPS management information systems and compiled into the PIP report each quarter. Because this data comes from live systems and is extracted at various points throughout the year, it can differ from other similar data in the public domain, such as the Scottish Prison Population Statistics. The data compiled in this report is not subject to the same level of quality assurance as the official statistics, although every effort is made to ensure its accuracy before publication.

We seek to be as open and transparent as possible, while also upholding our statutory obligation to ensure those in our care have their personal information protected. We have improved the way in which we collate and present data on our transgender population and, following advice from information governance experts, will only provide information on the total number of transgender people in our care. We have also applied disclosure control throughout the report where small numbers might mean that individuals could be identified.

Other data sources

- **Parliamentary Questions**

A full list of Parliamentary Questions answered in the Scottish Parliament on the subject of prisons is available from the Scottish Parliament website [here](#).

- **Corporate Plan**

The Corporate Plan identifies a set of strategic themes and outcomes, which defines and shapes SPS priorities over the duration of that Plan. This is currently on the SPS website [here](#).
